EXPERIENCE

1 CS multidisciplinary project

Mai 2024

Esi store management system Stocklo

Developed a comprehensive Store Management System that streamlines various operations, including purchasing management with suppliers, user and permission management through a permission-based system, and the discharge and exit of products. This project involved collaboration across multiple disciplines to ensure a robust, secure, and user-friendly solution

Internship

Mars 2024

Sonelgaz | Adrar, Algeria

Observed and studied the IT systems and software infrastructure used at Sonelgaz, gaining insights into their approach to energy management, database management, and network security. Developed an understanding of how technology supports the company's operations in the energy sector.

EDUCATION

higher Cycle ESI-SBA

higher school in computer science Sidi Bel Abess
2023-Now

2 CPI multidisciplinary project

Mai 2023

Safe hame

Developed a mobile application that allows users to remotely monitor and control their home environment. The system integrates various sensors, including water level, temperature, fire, gas, and motion sensors, to provide real-time status updates for each room in the house. This project ensures enhanced home security and automation, giving users peace of mind when they are away.

Preparatory Cycle ESI-SBA

higher school in computer science Sidi Bel Abess
2021-2023
